PCC-00: Empathic Failures
01 Child/Parent – Normal-Range Expressions of Individual Differences Creating Minor Breach-and-Repair Sequences
02 Parent – Narcissistic Failure of Parental Empathy
03 Child – Child Insensitivity and Empathic Failure

PCC-01: Situational Strains
01 Child - Captivated by an Object of Desire
02 Child – Resistance to Unpleasant Activity
03 Child – Resistance to Stopping Pleasurable Activity
04 Child – Resistance to Transition
05 Child – Wanting Affection
06 Child – Response to Parental Discipline
07 Child – Stress-Related Emotionality/Behavioral Dysregulation

PCC-02 Child Vulnerability Strains:
01: Child – Autism-Spectrum Vulnerability
02: Child – Behavioral Over-Activity
03: Child – Motivational-Behavioral Impulsivity
04: Child – Anger Regulation Challenges
05: Child – Anxiety Regulation Challenges

PCC-03 Child/Parent Vulnerability Strains:
01: Child/Parent – Attachment Insecurity
02: Child/Parent – Temperament Goodness of Fit
03: Child/Parent – Motivational Differences
   01: Parent Task-Oriented – Child Bonding-Oriented
   02: Parent Authority-Oriented – Child Independence-Oriented

PCC-04 Parent Vulnerability Strains:
01: Parent – Withdrawn/Disengaged
   01: Emotionally Distant, Disengaged, Neglectful
   02: Over-Sad Disengaged Parenting
02: Parent – Inflexible/Rigid Parenting
03: Parent – Intrusive Hyper-Anxious Parenting
04: Parent – Anger Dyscontrol in Parenting
05: Parent – Physically Assaultive Parenting
XX: Parent – Sexually Assaultive Parenting

PCC-05: Family Systems Strains
01 Family – Child Triangulation – Parental Coalition Against Child
02 Family – Child Triangulation – Parent-Child Coalition Against Parent
03 Family – Problematic Family Transition

Modifiers:
AP: Antisocial Pathology
   The parent-child conflict evidences antisocial pathology
CG: Chronic Grievance – Absent Forgiveness
   One or both parties to the parent-child conflict maintain a chronic grievance
toward the other party which is asserted to be “unforgivable”
LM: Lethal Mutation
   The parent-child conflict has mutated into a form that terminates the parent-
   child relationship
M: Malice
   The parent-child conflict evidences a desire to inflict injury
NP: Narcissistic Parenting
   Parenting evidences narcissistic or borderline personality organization
R: Revenge
   The parent-child conflict reflects a desire to revenge past conflict or
   perceived injustice
SAC: Substance Abuse - Child
   The parent-child conflict emerges from or is exacerbated by child substance
   abuse factors
SAP: Substance Abuse - Parent
   The parent-child conflict emerges from or is exacerbated by parental
   substance abuse factors
Attributions of Causality for the Cut-Off in the Child’s Attachment Bonding Motivations Toward a Parent Associated with Allegations of “Parental Alienation”

C.A. Childress, Psy.D. (2014)

Parent-child conflict can emerge from individual strains or combinations of strains identified in the Compendium of Parent-Child Conflict. For example, parent-child conflict can emerge from a single strain such as the child’s being captivated by an object of desire which the parent disallows, thereby resulting in parent-child conflict (PCC-01-01), or it can emerge from a combination of strains such as a child’s anger regulation challenges (PCC-02-04) being triggered by rigid and inflexible parenting (PCC-04-02) to create the parent-child conflict.

In the family processes traditionally identified as “parental alienation,” the causal assertions for the child's rejection of the targeted parent are:

**Assertions of Causality by the Allied Parent and Child:**

<table>
<thead>
<tr>
<th>Code</th>
<th>Domain</th>
</tr>
</thead>
<tbody>
<tr>
<td>PCC-04-01-01</td>
<td>Parent – Withdrawn/Disengaged: Emotionally Distant, Disengaged, Neglectful</td>
</tr>
</tbody>
</table>

**Description:** The targeted parent is too emotionally withdrawn, distant, and disengaged with the child. The attribution may contain allegations that the targeted parent spends too much time with his or her new romantic partner or new spouse and does not spend enough one-on-one special time with the child.

<table>
<thead>
<tr>
<th>Code</th>
<th>Domain</th>
</tr>
</thead>
<tbody>
<tr>
<td>PCC-04-02</td>
<td>Parent – Inflexible/Rigid Parenting</td>
</tr>
</tbody>
</table>

**Description:** The targeted parent is too rigid and inflexible in his or her parenting of the child and is not sufficiently sensitive to what the child feels, wants, or needs.

<table>
<thead>
<tr>
<th>Code</th>
<th>Domain</th>
</tr>
</thead>
<tbody>
<tr>
<td>PCC-04-04</td>
<td>Parent – Anger Dyscontrol in Parenting</td>
</tr>
</tbody>
</table>

**Description:** The targeted parent is unable to regulate his or her anger and so becomes overly angry and too punitive with the child.

<table>
<thead>
<tr>
<th>Code</th>
<th>Domain</th>
</tr>
</thead>
<tbody>
<tr>
<td>PCC-00-02</td>
<td>Parent – Narcissistic Failure of Parental Empathy</td>
</tr>
</tbody>
</table>

**Description:** The targeted parent is too self-absorbed and fails to empathize with the child’s wants, needs, and experience.

**Modifier LM-NP: Lethal Mutation from the addition of Narcissistic Parenting**

The chronic narcissistic failure of parental empathy for the child’s experiences exhibited by the narcissistically self-absorbed targeted parent produces child discouragement regarding the possibility of establishing an affectional and empathically attuned relationship with the targeted parent, resulting in the child’s emotional and psychological detachment from the parent-child relationship.
Description: The child maintains a chronic grievance toward the targeted parent for past parental failures that the child asserts are “unforgivable”

In some cases:

Description: The targeted parent was physically assaultive toward the child (i.e., physical child abuse) or toward the allied parent (i.e., domestic violence)

Description: The targeted parent was sexually assaultive toward the child (i.e., incest)

**Assertions of Causality by the Targeted Parent:**

Description: There is a cross-generational parent-child coalition of the child with a narcissistic/(borderline) allied and apparently “favored” parent against the targeted parent.

Modifier LM-NP: Lethal Mutation from the addition of Narcissistic Parenting

The addition of narcissistically distorted parenting practices by the allied and “favored” parent transforms the child’s conflict with the targeted parent into a lethal strain of parent-child conflict that seeks to terminate the parent-child relationship.

Description: Problematic transition of the family from an intact family structure to a separated family structure following divorce.

Non-cooperation of allied and “favored” parent in supporting a separated family structure; tacit or active support is provided by the allied and “favored” parent for a cut-off in the child’s relationship with the targeted parent.

Modifier LM-NP: Lethal Mutation from the addition of Narcissistic Parenting

The addition of narcissistic parenting from the allied and “favored” parent transforms the family’s problematic transition to a separated family structure into a lethal strain of parent-child conflict that seeks to terminate the child’s relationship with the targeted parent.
Causal Process: The “splitting”¹ dynamic of the allied and “favored” parent’s narcissistic/(borderline)² personality organization prevents the allied and “favored” parent from accommodating to the new complexity in role-relationships inherent to a separated family structure, in which the spousal relationship with the other person has ended, but the parental relationship of the other person continues.

Within the black-and-white polarized structure of the “splitting” dynamic, the termination of the spousal relationship requires the termination of the parental relationship as well.

The polarized structure of the “splitting” dynamic requires that the dissolution of the marital relationship with the other spouse also means the dissolution of the parental relationship of the other spouse. The polarized thinking of the “splitting” dynamic requires that the ex-spouse also becomes an ex-parent.

<thead>
<tr>
<th>Code</th>
<th>Domain</th>
</tr>
</thead>
<tbody>
<tr>
<td>PCC-01</td>
<td>Situational strains</td>
</tr>
</tbody>
</table>

Description: Situational parent-child conflict serve as justifying events related to more complex causative strains of parent-child conflict (PCC-05-02: Cross-Generational Coalition; and PCC-05-03: Problematic Family Transition).

Modifier LM-NP: Lethal Mutation from the addition of Narcissistic Parenting

Situational strains of parent-child conflict are transformed into lethal strains of parent-child conflict (i.e., are used as child justifications to terminate the parent-child relationship) by the addition of narcissistic parenting emanating from the allied and “favored” parent through the parent-child coalition of the child with the narcissistic/(borderline) allied and “favored” parent (PCC-05-02-LM-NP).

Situational parent-child conflicts are distorted and exaggerated into justifications for the cut-off of the child’s attachment bonding motivations toward the targeted parent. The allied and “favored” parent provides tacit or active support for the child’s provocations of situational parent-child conflicts.

¹ Splitting: “The individual deals with emotional conflict or internal or external stressors by compartmentalizing opposite affect states and failing to integrate the positive and negative qualities of self or others into cohesive images. Because ambivalent affects cannot be experienced simultaneously, more balanced views and expectations of self or others are excluded from emotional awareness. Self and object images tend to alternate between polar opposites; exclusively loving, powerful, worthy, nurturant, and kind – or exclusively bad, hateful, angry, destructive, rejecting, or worthless.” (American Psychiatric Association, 2000, p. 813; emphasis added)

² Theorists consider the narcissistic personality as possibly representing a variant of borderline personality organization

“One subgroup of borderline patients, namely, the narcissistic personalities... seem to have a defensive organization similar to borderline conditions, and yet many of them function on a much better psychosocial level” (Kernberg, 1975, p. xiii);

“The defensive organization of these patients [narcissists] is quite similar to that of the borderline personality organization in general...” (Kernberg, 1975, p. 229).

### Code Domain
PCC-00-03 Child – Child Insensitivity and Empathic Failure

**Description:** The child provokes parent-child conflict from an insensitivity to the parent’s feelings and desires originating from the child’s lack of empathy for the parent’s experience. The child’s insensitivity and empathic failure is secondary to more complex causative strains of parent-child conflict (PCC-05-02: Cross-Generational Coalition; and PCC-05-03: Problematic Family Transition).

### Code Domain
PCC-02-04 Child – Anger Regulation Challenges

**Description:** The child displays overly hostile and angry behavior toward the targeted parent, which is secondary to more complex causative strains of parent-child conflict (PCC-05-02: Cross-Generational Coalition; and PCC-05-03: Problematic Family Transition).

In some cases:

### Code Domain
PCC-02-05 Child – Anxiety Regulation Challenges

**Description:** The child displays overly anxious and fearful behavior toward the targeted parent. The anxious-fearful display by the child is secondary to more complex causative strains of parent-child conflict (PCC-05-02: Cross-Generational Coalition; and PCC-05-03: Problematic Family Transition).

**Associated feature:**

### Code Domain
PCC-04-03 Parent – Intrusive Hyper-Anxious Parenting

**Description:** The allied and “favored” parent engages in over-anxious and over-intrusive parenting while the child is on visitations with the targeted parent, which exacerbates the frequency and degree of conflicts the child has with the targeted parent. This associated feature is secondary to more complex causative strains of parent-child conflict (PCC-05-02: Cross-Generational Coalition; and PCC-05-03: Problematic Family Transition).
